>We recognize that there are enormous complexities involved in developing and  
>implementing such a plan. But, we want to voice our concerns about the  
>possibility of more and/or enlarging dams. We need to think about  
>controlling our water needs more and more in meeting our growth needs.  
>Putting water back into Mono Lake exemplifies what is possible. Please help  
>ensure that the plan when finalized :  
>  
>\* Maximizes water efficiency and conservation, and bases future water needs  
>on realistic assumptions rather than inflated demands;  
>  
>\* Removes barrier dams, increases instream flows, and acquires and restores  
>habitat for fish and wildlife;  
>  
>\* Does not rely on proposed dam raises or new offstream storage reservoirs;  
>  
>\* Improves water quality by enforcing pollution limits.  
>  
>We sincerely thank you for your support.
